

24th April 2019

Dear Parents/Carers,

We have now received our letter from Ofsted following our Section 5 inspection on 26th March 2019.

Governors are very pleased to report that Kings International College continues to be a **Good** school

As you will see from their letter, the inspectors have made many positive comments about the direction in which the college is travelling validating the changes that have been implemented and commending the hard work that has been put in by all concerned over the last eighteen months.

The report also reflects the tremendous support that you as parents have given us. Inspectors were very impressed by the views expressed in response to the parental online survey and by the seventy two free-text comments that they received on the day. Similar positive comments were also received from staff and students during the course of the inspection.

Ofsted will be returning within the next two years in order to collect further evidence that the changes introduced have had, and are continuing to have a positive impact on student outcomes. We welcome the opportunity to evidence that the new structures, systems and processes put in place have become embedded and that they are ensuring that all our students receive the very best education that we can provide over time.

The inspection letter can be found on the Ofsted website and it will be available on the Kings website within the next few days.

Yours sincerely

Ms J. Tuck

Chair of Governors
